TIREBOSS®
Tire Pressure Control

About us ⓘ

For over 30 years TPC International has provided Tire Pressure Control systems to aid in off-road mobility for vocational truck & equipment applications around the globe.

We are excited to introduce our new Monitoring and Maintenance systems. From holiday RV Trailers, Construction Trailers and Equipment, to Over the Road long haul truck & trailers our new wireless Tire Pressure Monitoring and Maintenance system is a great solution to ensure you never operate with a low tire again!

TIREBOSS® M
Monitoring and Maintenance System

info@tireboss.com 

Monitor

Maintain

- Digital live display of individual tire pressures
- Alerts & warnings when tire pressure is outside of normal ranges
- Wireless valve stem mounted sensors
- Monitoring of RV & construction trailers

- Maintain equal target pressure on dual tire sets
- Pressure differential between dual sets is the main cause of roadside failures.

.....

Never Operate With A Low Tire Again!

- Maintain tire pressure to a preset level
- Tires remain at operating pressure even with leaks
- Improves fuel economy by ensuring optimized tire pressure
